

# ULTIMATE PROTECTION

## Whole-System Electrical Surge Protection Designed to Stop Lightning-Induced Damage Before It Reaches Your Equipment

- › Tested to withstand lightning strikes
- › Responds faster than traditional surge protectors, helping prevent damage before breakers trip
- › Provides cleaner power by attracting internally-generated current surges

CleanVolt™ products feature failsafe surge protection technology engineered to optimize power quality, enhance equipment performance, and extend operational lifespan.

## Everyone needs electrical surge protection

Unique benefits CleanVolt™ offers that no other protector has proven:

- › Fastest connected response time on the market
- › Bi-directional operation, VFD applications
- › Instantaneous KA value providing unmatched catastrophic protection
- › Acts on current surging
- › Keeps connected equipment tolerance levels of 10% +/- in check
- › Limits interaction between connected devices in electrical panel
- › Provides a path of least resistance to attract damaging surges out of the system
- › Ability to trip the main over current device during lightning induced surges
- › Industry leading 40 year warranty

Conf To UL STD 1449, 5th Edition  
Certified to CSA STD C22.2 No. 269.2

### COST SAVINGS & RETURN ON INVESTMENT

A single surge, or an accumulation of current surges can damage motors, VFDs, or control boards — leading to thousands in repairs and downtime. CleanVolt™ helps prevent these events before they occur.

### INSURANCE

\$1,000,000 Liability Coverage  
Added peace of mind — your protection is backed beyond the hardware itself.

### ULTIMATE PROTECTION

The only solution that enables the time required for your main breaker to trip in certain emergencies, disconnecting you from the big event. All while correcting your power quality every second of every day.

### UNIQUE TECHNOLOGY

CleanVolt™ technology.  
The only solution out there, with unmatched responsiveness.

### NO MAINTENANCE

Install once. Protect continuously.  
No ongoing maintenance required.

### 40 YEAR WARRANTY

Designed to last the lifetime of your electrical system. If a high-intensity surge ever causes the unit to expire, it will be replaced at no cost.
